## OBJECTIVE

Front-end / Full Stack Development internship or related roles.

## ABOUT

Computer Science student at Mackenzie Presbyterian University (São Paulo, Brazil), with a technical degree in Systems Development from ETEC. Hands-on experience building React and TypeScript web applications — including REST API integration, database-backed features, and collaborative Git workflows with pull requests and code review. Fluent in English.

## ACADEMIC EXPERIENCE / PROJECTS

**FitMeta** React · TypeScript · Supabase · React Query

- Built a workout-management web app with user authentication, database-backed CRUD, and protected routes.
- Modeled server state and caching with React Query, and implemented global state management across the app.
- Integrated Supabase for authentication and data persistence.
- Designed a scalable, component-based architecture with reusable UI following best practices.

[fitmeta.com.br](https://fitmeta.com.br)

**Docgen** React · TypeScript · Ollama · Vite

- Developed a web app that accepts source code in 10+ languages, auto-detects the language, and generates structured technical documentation.
- Ran a local LLM through Ollama, so documentation is produced with no cloud services or API keys required.
- Practiced professional Git workflows — feature branches, pull requests, and code review — simulating a real development-team process.
- Built the interface with React, TypeScript, and Vite using reusable component patterns.
